Section 1. Chemical Product and Company Identification

Product Name

Polyflex Rapid Repair ISO Catalyst

Synonym

WP204A.00

Chemical Family

Not applicable. (Catalyst for Paint)

Manufacturer

SUPPLIER:
Wasser Corporation
4118 B PL NW, Suite B
Auburn, WA 98001, US
Phone# 253-850-2967

In case of Emergency

Section 3. Hazards Identification

Routes of Entry: Inhalation. Skin contact (absorption). Eye contact. Ingestion.

Potential Acute Health Effects

**Eyes:** Liquid or spray mist may irritate eyes. Over-exposure may cause severe irritation. Inflammation of the eye is characterized by redness, watering, and itching.

**Skin:** This product may irritate skin upon contact. Harmful if absorbed through the skin. May cause skin sensitization. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

**Ingestion:** Harmful if swallowed. Irritation or chemical burns of the mouth, pharynx, esophagus and stomach can develop following ingestion of this product. Even small amounts of liquid aspirated into the lungs during ingestion or vomiting may cause pulmonary injury and possibly death.

**Inhalation:** Harmful if inhaled (irritant, sensitizer). Over-exposure by inhalation of the vapors/spray mist may produce severe irritation of respiratory tract, characterized by coughing, choking, or shortness of breath. May cause sensitization by inhalation. May cause nausea, vomiting and general weakness. Massive overexposure can cause unconsciousness and death.

Potential Chronic Health Effects

**Eyes:** Repeated or prolonged contact with spray mist may produce chronic eye irritation.

**Skin:** Repeated skin exposure can produce local skin destruction, or dermatitis, possibly skin and/or respiratory sensitization. (Skin only exposure can result in lung sensitization).

**Ingestion:** May be fatal if swallowed.

**Inhalation:** Repeated or prolonged inhalation of vapors/spray mist may lead to chronic respiratory irritation and decrease of lungs capacity. May cause respiratory (lung) sensitization by inhalation and skin contact.

Other chronic effects on Humans

The substance is toxic to mucous membranes, upper respiratory tract, lungs, blood, kidney, liver. Exposure may cause asthma, decrease of lung capacity, dermatitis and pulmonary oedema; effects may be delayed. Sensitive individuals may develop eczema and/or asthma on inhalation of this material. However, in light of good industrial hygiene, exposure to any chemical should be kept to a minimum.

Section 4. First Aid Measures

**Eye Contact**
Check for and remove any contact lenses. IMMEDIATELY flush eyes with running (lukewarm) water for at least 15 minutes, keeping eyelids open. DO NOT use an eye ointment. Seek medical attention.

**Skin Contact**
Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Rinse with plenty of running water (15-30 minutes). If irritation persists, seek medical attention.

**Hazardous Skin Contact**
If the product gets onto the clothed portion of the body, remove the contaminated clothes as quickly as possible, protecting your own hands and body. Place the person under shower. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Rinse with plenty of running water (15-30 minutes). Seek medical attention. Wash contaminated clothing before reusing.

**Inhalation**
Allow the person to rest in a well ventilated area. Loosen tight clothing around the person’s neck and waist. If symptoms persist, seek medical advice immediately (show the label when possible).

**Hazardous Inhalation**
Evacuate the person to a safe area as soon as possible. Loosen tight clothing around the person’s neck and waist. If the person is not breathing, administer mouth-to-mouth resuscitation. Warning: It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation if the inhaled material is toxic, infectious or corrosive. Oxygen may be administered if breathing is difficult. Seek medical attention.

**Ingestion**
DO NOT induce vomiting. Have conscious person drink several glasses of water or milk. Seek immediate medical attention.

**Hazardous Ingestion**
DO NOT induce vomiting. Have conscious person drink several glasses of water or milk. Never give an unconscious person anything to ingest. Even small amounts of liquid aspirated into lungs during ingestion or from vomiting may cause mild to severe pulmonary injury and possibly death. If breathing is difficult, administer oxygen. If the person is not breathing, administer mouth-to-mouth resuscitation. WARNING: It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation when the material is toxic, infectious or corrosive. Avoid mouth-to-mouth contact by using mouth guards or shields. Seek immediate medical attention.
Section 5. Fire and Explosion Data

Flammability of the Product: Combustible.

Auto-Ignition Temperature: The lowest known value is 393°C (739.4°F) (Methyl n-amyl ketone).

Flash Points: The lowest known value is CLOSED CUP: 39°C (102.2°F) (Tagliabue.). (Methyl n-amyl ketone)

Flammable Limits: The greatest known range is LOWER: 1%  UPPER: 13.1% (Isophorone Diisocyanate (IPDI))

Products of Combustion: Carbon oxides (CO, CO2), and other toxic compounds (nitrogen oxides, isocyanate vapors and traces of hydrogen cyanide).

Fire Hazards in Presence of Various Substances: Combustible in presence of open flames and sparks.

Fire Fighting Media and Instructions: SMALL FIRE: Use DRY chemicals, CO2, alcohol foam or water spray. LARGE FIRE: Use water spray or fog. Never direct a water jet in the container in order to prevent any splashing of the product which could cause spreading of the fire. Cool the containers with water spray or fog in order to prevent pressure build-up, autoignition or explosion. Firefighters should be equipped with self-contained breathing apparatus to protect against toxic and irritating fumes. During a fire, isocyanate vapors and other irritating, highly toxic gases may be generated by thermal decomposition or combustion.

Section 6. Accidental Release Measures

Small Spill: Absorb with an inert material and place in an appropriate waste disposal container. Treat with a neutralizing solution (5% ammonia water, or 5-10 % sodium carbonate in water). Wear suitable protective clothing and respirator.

Large Spill: Combustible, poisonous liquid, insoluble or very slightly soluble in water. Ventilate. Eliminate all sources of ignition. Wear suitable protective clothing, gloves and eye/face protection. A self-contained breathing apparatus should be used to avoid inhalation of the product. Warn personnel to move away. Stop leak if without risk. DO NOT touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Cover with WET earth, sand or other non-combustible material, or with DRY absorbent wetted with a neutralizing solution (5% ammonia water, or 5-10% sodium carbonate in water). After 15 minutes transfer it to waste container, or put in open drums - fill the drums half way. Do not seal - evolution of CO2 can cause pressure build-up. Keep drums (not sealed) outside, or in safe ventilated area for a few days. After clean-up monitor the vapors concentration. Use the neutralizing solution to decontaminate the surface and the tools. The spilled material, clean-up residues, and spent decontamination solution are hazardous wastes. Call for assistance on disposal.
# Material Safety Data Sheet

**Product Name:** Polyflex Rapid Repair ISO Catalyst

## Section 7. Handling and Storage

### Precautions
Keep locked up and out of reach of children. Manipulate in a well ventilated area. In case of insufficient ventilation, wear suitable respiratory equipment. Do not breathe gas/fumes/vapor/spray. Avoid contact with skin and eyes. Contact lenses should not be worn. Keep away from foodstuff, drinks and tobacco. Eating, drinking and smoking should be prohibited in area where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Ensure that eyewash station and safety shower are proximal to the work-station location. In case of accident or if you feel unwell, seek medical advice immediately (show the label when possible). Individuals with respiratory problems (asthma, chronic bronchitis), or allergic to isocyanates or solvents, should avoid any contact with this product. **ATTENTION:** Isocyanate vapors cannot be smelled until concentrations are well above the safe exposure limit! Ground all equipment containing material (during handling, mixing and spraying).

### Storage
Keep away from heat. Keep away from sources of ignition. Keep container tightly closed and in a well-ventilated place. Contains moisture sensitive material; store in a dry place. Keep away from incompatibles.

## Section 8. Exposure Controls/Personal Protection

### Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash station and safety shower are proximal to the work-station location. Do air monitoring if possible.

### Personal Protection
During mixing, handling and application: Splash goggles. Full protective clothing. Gloves (impervious). Suitable respiratory equipment. When air concentrations are not known or above the threshold limit value, an air-supplied respirator. Refer to OSHA Respiratory Protection Standard (29 CFR 1910.134). When welding, refer to OSHA Standard (29 CFR 1926.354): Welding, Cutting and Heating in Way of Preservative Coatings. **ATTN:** Air-purifying (cartridge type) respirators are not approved for protection against isocyanates due to their low warning properties.

### Personal Protection in Case of a Large Spill
Splash goggles. Full suit. Boots. Gloves (impervious). Self-contained breathing apparatus must be used to avoid inhalation of the product.

## Section 10. Stability and Reactivity Data

### Stability
The product is stable.

### Instability Temperature
Not available.

### Conditions of Instability
Not available.

### Incompatibility with various substances
Incompatible with water, strong oxidizing agents, amines, strong bases, strong acids, alcohols. Absorbs moisture from the air. Reacts slowly with water to liberate CO2 gas.

### Corrosivity
Not considered to be corrosive for glass and metals according to our data base.

### Special Remarks on Reactivity
React slowly with water to liberate CO2 gas. Contact with moisture or other materials which react with isocyanates may cause polymerization (amines, strong bases, alcohols, metal compounds and surface active materials). (Isophorone Diisocyanate (IPDI))
Material Safety Data Sheet

Product Name: Polyflex Rapid Repair ISO Catalyst

Section 11. Toxicological Information

Routes of Entry
Inhalation. Skin contact (absorption). Eye contact. Ingestion.

Toxicity to Animals
See: Section 2

Chronic Effects on Humans
The substance is toxic to mucous membranes, upper respiratory tract, lungs, blood, kidney, liver. Exposure may cause asthma, decrease of lung capacity, dermatitis and pulmonary oedema; effects may be delayed. Sensitive individuals may develop eczema and/or asthma on inhalation of this material. However, in light of good industrial hygiene, exposure to any chemical should be kept to a minimum.

Other Toxic Effects on Humans
See: Section 3

Special Remarks on Toxicity to Animals
No additional remark.

Special Remarks on Chronic Effects on Humans
Isocyanates are not known to cause cancer in humans, but may cause skin and respiratory sensitization in humans. Sensitive individuals may develop eczema and/or asthma on inhalation of this material. Exposure may cause asthma, dermatitis and pulmonary oedema; effects may be delayed. Reports have associated repeated and prolonged occupational exposure to solvents with permanent brain and nervous system damage, and other systemic effects. Intentional misuse by deliberately concentrating and inhaling vapors may be harmful or fatal.

Special Remarks on other Toxic Effects on Humans
Exposure can cause nausea, headache and vomiting. Over-exposure can cause lung irritation, chest pain and oedema which may be fatal. Sensitizer - skin and inhalation. Medical supervision of all employees who come in contact with this product is recommended (preemployment and periodic medical examinations).

Section 12. Ecological Information

Ecotoxicity
Not available.

BOD5 and COD
Not available.

Products of Biodegradation
Not available.

Toxicity of the Products of Biodegradation
Not available.

Special Remarks on the Products of Biodegradation
No additional remarks.

Section 13. Disposal Considerations

Waste Disposal
In accordance with municipal, state, and federal regulations. Consult your local or regional authorities. Empty containers must be handled with care due to product residue. Do not heat or cut empty containers with electric or gas torch.

Section 14. Transport Information

DOT Classification
DOT CLASS 3: Flammable liquid with a flash point lower than 37.8°C (100°F). PG: III

DOT Identification number
UN1263 Paint related material.

Special Provisions for Transport
No specific remarks.

Section 3. Hazards Identification

Routes of Entry: Ingestion. Skin contact. Inhalation.

Potential Acute Health Effects

- **Eyes:** This product may irritate eyes upon contact.
- **Skin:** This product may irritate skin upon contact and may cause dermatitis.
- **Ingestion:** Harmful if swallowed.
- **Inhalation:** May irritate nasal passages and throat, cause dizziness or headaches.

Potential Chronic Health Effects

- **Eyes:** Repeated or prolonged contact with spray mist may produce chronic eye irritation.
- **Skin:** Repeated skin exposure can produce local skin destruction, or dermatitis.
- **Ingestion:** Harmful if swallowed.
- **Inhalation:** There is no known effect from chronic exposure to this product.

Other chronic effects on Humans No additional remarks.

Section 4. First Aid Measures

Eye Contact

Check for and remove any contact lenses. IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. If irritation persists, consult a physician.

Skin Contact

Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. If irritation persists, seek medical attention.

Hazardous Skin Contact

If the product gets onto the clothed portion of the body, remove the contaminated clothes as quickly as possible, protecting your own hands and body. Place the person under shower. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Rinse with plenty of running water. Wash contaminated clothing before reusing.

Inhalation

Allow the victim to rest in a well ventilated area.

Hazardous Inhalation

Allow the victim to rest in a well ventilated area. Seek medical attention.

Ingestion

DO NOT induce vomiting. Have conscious person drink several glasses of water or milk. Seek immediate medical attention.

Hazardous Ingestion

DO NOT induce vomiting. Have conscious person drink several glasses of water or milk. Never give an unconscious person anything to ingest. Lower the head so that the vomit will not reenter the mouth and throat. Liquid aspirated into lungs during ingestion or from vomiting may cause mild to severe pulmonary injury. If the person is not breathing, administer mouth-to-mouth resuscitation. Seek immediate medical attention.

### Fire Fighting Media and Instructions
- **SMALL FIRE:** Use DRY chemicals, CO2, water spray or foam.
- **LARGE FIRE:** Use water spray or fog. Never direct a water jet in the container in order to prevent any splashing of the product which could cause spreading of the fire. Cool the containers with water spray or fog in order to prevent pressure build-up, autoignition or explosion. Firefighters should be equipped with self-contained breathing apparatus to protect against toxic and irritating fumes. During a fire, irritating, toxic gases may be generated by thermal decomposition or combustion.

### Special Remarks on Fire Hazards
- When heated to decomposition it emits highly toxic fumes.
- No additional remark.

### Special Remarks on Explosion Hazards
- Not applicable.

## Section 6. Accidental Release Measures

### Small Spill
- Absorb with an inert material and put the spilled material in an appropriate waste disposal.

### Large Spill
- Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Prevent entry into sewers, basements or confined areas; dike if needed. Wear suitable protective clothing. Dispose of according to local and regional authority requirements. Call for assistance on disposal.
**Section 7. Handling and Storage**

**Precautions**

Avoid contact with skin and eyes. Eyewash station and safety shower should be available. Use only in well ventilated areas.

**Storage**

Keep out of reach of children. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed and in a well-ventilated place.
